# How to Feel About Consumer Feelings

4th quarter 2024

Matt Lipps, CFA, Investment Strategist, Dimensional Fund Advisors

Does your neighbor know where the economy is headed in the next 12 months? Since the 1960s, the University of Michigan has published the popular Consumer Sentiment Index, which asks everyday folk questions like: “Are you better off or worse off financially than you were a year ago?” or “Do you think that a year from now you will be better off financially, worse off financially, or just about the same as now?”<sup>1</sup> This index is sometimes viewed as a beacon of how investors feel about the direction of the economy.

As of September 30, 2024, the index sat at 70.1, pessimistic relative to its long-run average of 85.1.<sup>2</sup> Investors interpreting this as an ominous sign for markets may not have anything to fear though, as the data show this index has not been great at predicting future returns. Plotting the level of the Consumer Sentiment Index against subsequent 12-month stock market returns shows no discernible pattern, except that stocks tend to go up more often than they go down. Out of the 226 months where the sentiment index was below the long-run average, the average equity premium over the next year was 10.6%.

If your neighbor is feeling sour, that doesn't necessarily mean *you* should be changing your outlook or your investment portfolio. Markets tend to price in the latest views on the economy, including consumer optimism.
